

VIDEO EDITING

Module 1: Introduction to Video Editing

- What is video editing?
- History and evolution of editing
- Types of video editing (linear, non-linear, online/offline)
- Overview of popular editing software (Premiere Pro, Final Cut Pro, DaVinci Resolve, CapCut, Filmora, etc.)
- Understanding video formats, resolution, frame rates, and aspect ratios

Module 2: Basics of Video Editing Software

- Interface and workspace overview
- Importing media (video, audio, images)
- Timeline and sequence basics
- Tools (cut, trim, ripple, rolling, slip, slide, etc.)
- Organizing and managing projects

Module 3: Editing Techniques

- Cutting and trimming clips
- Adding transitions and effects
- Working with multiple camera angles (multicam editing)
- Creating split screens
- Slow motion and time-lapse
- Color correction and color grading basics

Module 4: Audio Editing and Mixing

- Importing and syncing audio
- Adjusting audio levels and fades
- Removing background noise
- Adding background music and voiceovers
- Audio effects and equalization
- Using keyframes for audio animation

Module 5: Text, Titles & Graphics

- Adding text and titles
- Lower thirds and captions
- Motion graphics basics
- Using templates and presets
- Intro and outro creation
- Animated text effects

Module 6: Visual Effects (VFX) & Motion Graphics

- Introduction to compositing and green screen (chroma key)
- Adding special effects and overlays
- Tracking and masking techniques

- Motion graphics with After Effects (optional advanced module)

Module 7: Color Correction & Grading

- Understanding color theory
- Using scopes (Waveform, Vectorscope, Histogram)
- Correcting white balance and exposure
- LUTs and creative color grading

Module 8: Exporting and Rendering

- Export settings for YouTube, Instagram, Reels, and short films
- Codecs, bitrates, and formats explained
- Optimizing video for web and mobile
- Archiving and project backup

Module 9: Practical Projects

- Editing a vlog
- Editing a short film / music video
- Creating a cinematic montage
- Social media content editing (Reels, Shorts)
- Corporate or educational video editing

Module 10: Advanced Editing Techniques

- Multi-camera editing
- Advanced transitions and masking
- Advanced sound design
- Motion tracking
- Working with 4K and HDR footage

Module 11: Professional Workflow & Career

- Project organization and workflow optimization
- Collaboration and file sharing
- Building a showreel
- Freelancing as a video editor
- Monetizing your skills (YouTube, clients, agencies)
